

CC AHEC PROGRAMS

Kids to Health Careers

Kids to Health Careers aims to promote health career awareness and readiness. Our curriculum teaches the District's youth CC AHEC's "3H" approach:

3H's for Health Career Success

1. Healthy Life Skills
2. Healthy Choices
3. Health Career Awareness

DC AHEC Scholar Program

The DC AHEC Scholar Program was developed by faculty from the AHEC partner schools to prepare students for clinical practice in primary care settings with a special emphasis on underserved populations. Scholars will make a first-hand impact on underserved communities in D.C. and the benefits include:

- Guaranteed clinical training placement in a local community health center
- Recognition at student's commencement ceremony
- A competitive advantage for external scholarship opportunities, residency programs and/or loan repayment programs

Clinical Placements

Clinical training for medical, nurse practitioner, and physician assistant students is available through CC AHEC partner clinics. CC AHEC partners with Safety Net Clinics to provide health care in underserved communities.

Continuing Education

CC AHEC provides professional support for health care professionals practicing in underserved areas in the District of Columbia. Our goal is to support our Clinical Preceptors by funding opportunities that enhance clinical skills and help maintain professional certifications.

Community Health

Each month CC AHEC hosts or participates in an outreach activity with our partners that facilitates the unique partnership between academic institutions and community based organizations.
